We present this profile to you for demonstration of our high quality standards and professionalism

”

Geel Technology is an acclaimed icon as a quick fix solution provider well-known for adding value-driven, turnkey solutions for our clients. Geel Technology assert that modern businesses find the right systemic approach to leverage any business modal and create a mass impact by gathering the correct data and expertise related to the product and services.

Our Experties Is Our Advantage

We are a team of committed professionals that are up to your task. Our approach is simple yet effective: we strive for excellence in every project we work on. We've been developing our expertise for more than ten years and have successfully finished more than 500 projects. We are not going to stop and are ready to complete tasks that will benefit your business.

Our team embraces exceptionally motivated entities who are professionals and certified in their respective areas of expertise.

Our Process

At Geel Tech, we are passionate about software development and delivering innovative solutions to our clients. Our process is based on four key principles: quality, agility, collaboration and communication.

Communication: We keep our clients informed of our progress and challenges throughout the project. We use clear and concise language to communicate our ideas and solutions. We listen to feedback and suggestions and incorporate them into our work.

Agility: We adapt to changing requirements and feedback from our clients and users. We use agile methodologies such as Scrum and Kanban to deliver working software in short iterations and respond to change quickly.

Quality: We ensure that our softwares meets the highest standards of functionality, reliability, usability and security. We use best practices such as code reviews, testing, debugging and documentation to achieve quality.

Collaboration: We work as a team with our clients and stakeholders to understand their needs and expectations. We use tools such as Git, Slack and Zoom to facilitate collaboration and transparency.

3 Short Steps

Analysis:

We listen to your requirements and understand your goals. We conduct a thorough research and analysis of your market, competitors, and target audience. We define the scope, timeline, and budget of the project.

Design:

We create a user-friendly and attractive design that reflects your brand identity and vision. We use the latest tools and technologies to ensure a smooth and responsive user experience. We test and refine the design until you are satisfied.

Development:

We code and implement the design using best practices and standards. We use agile methodology to ensure flexibility and adaptability. We perform rigorous testing and debugging to ensure quality and functionality. We deploy and launch the product. your preferred platform.

Our Values

- 1 Innovation**
 We strive to create novel and effective solutions that meet the needs of our customers and stakeholders. We embrace change and challenge ourselves to learn and grow.
- 2 Teamwork**
 We collaborate and communicate with respect and trust. We leverage our diverse skills and perspectives to achieve common goals. We support and empower each other to succeed.
- 3 Integrity**
 We act with honesty and accountability. We uphold the highest ethical standards and take responsibility for our actions. We honor our commitments and deliver on our promises.
- 4 Passionate**
 We are driven by a shared vision and purpose. We are enthusiastic and motivated to make a positive impact. We celebrate our achievements and have fun along the way.

95%

Clients Statistics

Geel Tech has a proven track record of delivering high-quality products and services to its clients, with a satisfaction rate of 95%.

Bringing Top Experts Together

We work with clients from various sectors and domains, providing them with innovative and reliable solutions that meet their needs and expectations. At Geel Tech, we value quality, efficiency, and customer satisfaction above all. Contact us today and let us help you turn your ideas into reality.

Working Team

Our team is composed of experts in Geel Technology, a cutting-edge field that combines geospatial data and machine learning. Our goal is to provide reliable and actionable insights for our clients and partners, using state-of-the-art geel algorithms and tools.

Innovative Solutions

Team Working on Geel tech is a group of researchers and engineers who are developing innovative solutions for sustainable energy production and storage.

Main Goal

The team's main goal is to create a prototype of a geel device, which is a novel type of fuel cell that uses gel electrolytes and metal catalysts to convert chemical energy into electrical energy.

Our Challenges

The team's current challenges include optimizing the performance and durability of our team, finding suitable languages for better programming, and testing softwares under various conditions and scenarios.

Company Working

The team's expected outcomes are to demonstrate the feasibility and potential of Geel technology, to publish their findings in reputable journals and conferences, and to attract funding and collaboration opportunities.

Geel Tech helped us create a user-friendly and engaging website that increased our online presence and conversions.

Boost your Business

Whether you need to optimize your workflow, enhance your customer experience, or increase your revenue, Geel Tech can help you achieve your goals. With our cutting-edge technology and expert team, we can boost your business performance and deliver results that exceed your expectations. Contact us today and find out how Geel Tech can transform your business.

Plan Success

Geel Tech is proud to announce that our latest project has been a success. We have developed a new software solution that can optimize the performance and efficiency of any business. Our team of experts has worked hard to deliver a high-quality product that meets the needs and expectations of our clients. We are confident that our software will help our clients achieve their goals and grow their businesses.

More Creative & Innovation

We are a company that strives for more creativity and innovation in every project. We believe that the best solutions come from combining different perspectives and ideas, and we foster a culture of collaboration and experimentation. Our goal is to deliver products and services that exceed our clients' expectations and make a positive impact on the world.

Comapny can acheive your sucess

We believe that your success is our success. That's why we offer a range of services and solutions to help you achieve your goals and grow your business. Whether you need marketing, branding, web design, or consulting, we have the expertise and experience to deliver results. We work with you to understand your needs, challenges, and opportunities, and tailor our approach to suit your specific situation.

Let's Get To Work! Ready To Do This.

Our Services

“We Provide The Best Services Ever”

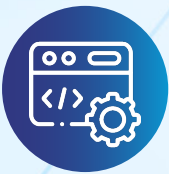

We help premium brands achieve their future through innovation and creative perspectives. We grow your company through proprietary in-house ideas, tested and perfected over the years.

App Development

the process of creating software applications that run on various devices, such as smartphones, tablets, computers, or smartwatches. App development can involve different programming languages, frameworks, tools, and methodologies depending on the type and purpose of the app. App development can be divided into two main categories: native and cross-platform.

Website Development

Website development is the process of creating, designing, and maintaining websites for various purposes. It involves coding, testing, debugging, and deploying web applications that run on the internet or intranet. Website development can be done using different technologies, such as HTML, CSS, JavaScript, PHP, Ruby, Python, and more. Website development requires technical and creative skills, as well as an understanding of the user's needs and expectations.

“Geel Tech’s mission is to make AI accessible and beneficial for everyone, regardless of their background or skill level.”

We present this profile to you for demonstration of our high quality standards and professionalism

Testing Software's

We ensure that the software meets the requirements and specifications, and that it is free of errors and bugs. Testing software can involve different types of tests, such as unit tests, integration tests, system tests, and acceptance tests. Testing software can also use different methods, such as black-box testing, white-box testing, or gray-box testing. Testing software can help improve the quality, reliability, and performance of the software product.

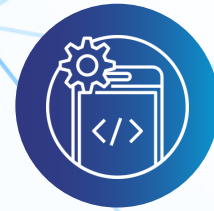

UI/UX Design

UI/UX design, which stands for User Interface (UI) and User Experience (UX) design, is a crucial aspect of creating digital products such as websites, mobile applications, software, and more. It focuses on enhancing the usability, accessibility, and overall satisfaction of the user when interacting with a product.

App Development

Building intuitive and easy-to-use apps from idea to implementation. We use native and hybrid technologies. Our goal is to create experiences that benefit customers and have a measurable impact on our business!

Need an app for Android, iOS, or both? Our team of mid- and senior-level engineers will take care of any type of mobile project. We have extensive experience with the end-to-end development of mobile apps that work seamlessly with any system or device. Our talented team can develop native and cross-platform solutions for clients promptly.

**YOUR CUSTOMERS WANT ACCESS TO YOUR BUSINESS ANYTIME, ANYWHERE...
Geel TOP-NOTCH MOBILE APP DEVELOPMENT TALENT WILL MAKE SURE
THEY CAN**

We are pushing the boundaries of what's possible on mobile by creating transformative mobile experiences that solve business challenges for clients ranging from large enterprises to innovative startups and creative entrepreneurs. With in-depth knowledge of native iOS, Android and cross-platform application development, we make sure that your idea is transformed into a beautifully designed, user-friendly and engaging mobile solution of a superior quality.

”

Geel can help make your iPhone application idea a reality bringing expertise in design and best iPhone development practices to the table. Our deep knowledge of mobile security and cross-platform integration makes us a perfect partner if you are thinking about BYOD strategy implementation.

App Development

We excelled at developing cutting-edge iPhone and iPad applications that are tailored to suit client requirements. We have worked with industry specific solutions as well as customized apps for iPhone. potato iPhone software development teams are experts in a variety of areas including games, finance applications, telecom, educational applications and mobile solutions for the publishers.

Testing Software's

*Are you looking for a reliable and experience team for testing? If you are looking for any testing or have any custom requirements, we are here to help **ACHIEVE FULL CYCLE QA AND TESTING EXCELLENCE. DON'T JUST DETECT ISSUES. PREVENT THEM.***

For 13 years Geel Software utilized an Integrated Quality Assurance practice to ensure the highest quality of our deliverables. We have perfected QA and Testing strategy and methodology that blend seamlessly into the development lifecycle without crossing the important boundary between the development and software quality assurance processes.

For 13 years Geel Software utilized an Integrated Quality Assurance practice to ensure the highest quality of our deliverables. We have perfected QA and Testing strategy and methodology that blend seamlessly into the development lifecycle without crossing the important boundary between the development and software quality assurance processes.

Consulting

We work with you to assess your current Quality Assurance processes and help you define and build the best QA strategy with the right frameworks and tools.

Complete Lifecycle

The goal of an effective QA process is to quickly identify and correct defects. We will help you define your test plan for both manual and automated testing across the entire software development lifecycle: from requirements through design, development, deployment and maintenance.

Testing Software's

Custom Teams

Rapidly get a team that feels like an extension of your own. We work with you to quickly get the right team in place for your short- and long-term testing needs.

Web, Mobile, On-premises Applications

We are skilled in defining, executing and automating testing for Web, SaaS, Cloud online; Native, Hybrid and Responsive mobile; Stand-alone and Client/Server on-premises. We help you deliver impeccable quality, scalable performance and outstanding UI on any platform.

Embedded Agile

The agile development methodology is an integral part of our approach. Our QA engineers, embedded as part of your teams, help you produce quality results on a rapid, regular basis. We work closely with Scrum Masters and the development team to deliver well-tested, functionally-complete products in every agile sprint or cycle.

Unit Testing Automation Platform

In the age of Agile Development and Continuous Integration it has become important for developers to write and integrate Unit Tests into their coding workflow. Kanda works with your development team to create and integrate the Unit Test Execution Bench that minimizes the extra efforts for developers to use unit testing without decreasing the power of unit tests.

Test Automation

We help you identify the best areas for testing automation and develop the scripts to enable and automate a script execution platform. We work with you to choose the right frameworks and tools to enable your QA strategy and to embed it in your development lifecycle.

UI/UX Design

Geel Tech offers a comprehensive UI/UX design service tailored to your needs:

- **Understanding Users:**

We focus on understanding your users deeply through thorough research.

- **Effective Prototyping:**

We create interactive prototypes for insightful user testing and efficient design.

- **Aesthetic Visuals:**

Our designs are visually appealing and aligned with your brand identity.

- **Continuous Improvement:**

We iterate based on user feedback to enhance usability and satisfaction.

- **Accessibility and Responsiveness:**

Designs are optimized for all devices and inclusive for diverse users.

- **Strategic Collaboration:**

We collaborate closely with you, integrating your insights and aligning with your goals.

- **Post-launch Enhancements:**

Our support extends post-launch, focusing on continuous product improvement based on data and
